

M.G.-TC / M.G.-TD BONNET BRACKETS

Install these brackets by attaching them to the radiator supports, using the existing bolts. They mount on the outside of the support rods. Photo 1 shows the support in place, and Photo 2 shows the bonnet setting on the bracket. (Photos show the bracket on a TD).

NOTE: On a TC, check to be sure the back edge of the bracket doesn't contact the bottom edge of the bonnet side when it is resting in the bracket. (This could chip the paint along the bonnet edge). If this occurs, you can insert a small piece of rubber or felt in the bottom of the bracket.
